

# ALX AICE: Milestone #1 Worksheet

**Tip: Review the [rubric for this milestone here](#). It will guide you in achieving a good passing score.**

## Step 1: AI Toolkit

Locate your own [copy of the AI Toolkit](#) from your activity on [Building Your AI Toolkit](#).

Next, Click "**Share**" (under the 3 dots) and adjust the settings so that it looks like this:

Done

**Then, copy the link and paste it into the box below.**

### Step 1: Your AI Toolkit

https://docs.google.com/spreadsheets/d/  
1OcPOtVlbrZrSiFhelwQt4ho1TwtzhLSXBd6JqHdmdV4/edit?usp=sharing

*If you need more help with this, Google for video instructions on sharing files in Google Drive, or ask a peer.*

## Step 2: Reflection on the use of AI

Take some time to think about the things you have learned about AI and how it may impact your future. After that, write a brief paragraph that answers the questions in the box below.

**To pass this part of your milestone, your reflection paragraph must answer all three questions. You can also write out the answers to each question in three separate sentences.**

### Step 2: Reflection on the use of AI

1. *Which aspects of interacting with AI in your daily life are you most excited or concerned about?*
2. *In what ways do you think AI will impact your current or future career?*
3. *What are some of the ethical challenges posed by AI that you are most worried or curious about?*

### Reflection Paragraph here

1. I am excited about the fact that AI, specifically generative AI, can give out some good ideas which can serve as a foundational block for brainstorming or expanding creativity.
2. AI will make me a highly demanded individual as it requires essential soft skills, quantitative reasoning and critical thinking. The role of AI is gradually digitalising my field (health) which makes me a best fit.
3. I am concerned about the issue of privacy and control, especially since AI thrives on data. A classical example would be in the area of health, there is the tendency of patients dependent on AI health assistants getting manipulated based on their medical records and reliance on smart systems to be able to perform their task. People who have chips implanted in their brain invasively could be manipulated, thus having no control of themselves.

**Please go back to Savanna and continue with your learning content. You will be prompted on when to return to complete Part B.**

### Step 3: Target industry & role reflection and PICS

Locate your [Personal Mission Statement Worksheet](#) in your personal ALX AICE Google Drive.

**Make sure you have filled out the following in your personal mission statement worksheet:**

**Part 1: Reflection on Your Target Industry And Role**

- *Industry Exploration*
- *Role Identification*
- *Writing Your Industry Focus Statement*

**PART 2: Write down your PICS (You must state at least 2)**

- *Passions: What would you get out of bed for in the morning if money wasn't an issue?*
- *Interests: What are you most curious about?*
- *Causes: What keeps you up at night?*
- *Strengths: What is your superhero power?*

Once you have confirmed that, click "Share" (under the 3 dots) and adjust the settings so that it looks like this:
